Hi Nonvikan Karl-Augustt,

Navigating the maze of complex government compliance requirements is a daunting prospect. Confusing abbreviations and terminology only make charting this course more difficult.

In this whitepaper, we discuss the relevant regulations and outline what they mean for end users and administrators deploying or configuring their IT infrastructure. If you're looking to understand what **FIPS**, **FedRAMP** and **DISA-STIG** are all about, this whitepaper is for you.

You will learn about ▼

- **FIPS 140** crypto modules

- **DISA STIG** hardening
- **Security patching for FedRAMP**
- Controlled access management with **Active Directory** integration
- Ubuntu in **air-gapped environments**
